# The Organic Beauty Expert

You definitely are the exact opposite of what everyone hates about the big print magazines...it's obvious that you're an indie force to be reckoned with.

### Shea it to me baby! My top shea picks for the winter

Shea butter is everywhere nowadays. Every company says "made with shea Butter" and when you look at the ingredient listings, you see it way down at the bottom of the list. Hello!

Ladies (and lurking guys) don't put out \$40 for [L'occitane's shea butter](#). Not all shea butter is created equal but some shea butter is just way overpriced. Here's my shea suggestions:

- [Purely Shea](#): at \$21.50 they offer a 3.5 oz tub of super rich and creamy shea butter that has become a fixed product after my evening shower. Just a few dabs and my entire body is super quenched and moisturized. I like it unscented, but if you don't like a slight nutty scent, check out the Lavender.
- [Ah Shayh](#): offers some big ol' tubs of super great shea products, all under \$20 bucks. The "Treat our Feet" cream is a delicious blend of mango and shea and keeps my piggy toes feeling soft and sexy.
- [Shea Terra Organics](#): Shea Terra offers kick ass quality shea products at a ridiculously low price! Nothing more to say. Go get some!

Save your duckies and get some shea to keep your skin looking fabulous this winter!
